

UK House | Oxford Street | London WDL 113/200195

Project type: Measured Surveys

Value: £93,350

Involvement: Measured Surveys
Calculating GIA & NIA

What we did

We were given the task to produce floor plans for a portfolio of 25 properties located nationwide across the British Isles. Total approximate area was £1.5million square feet. When Hard Copies were available, these were converted into CAD Format and for the remaining buildings, measured surveys were carried out. UK House was one of the properties and we have visited the site many times since the first instruction to keep the plans up to date, including producing external Elevations.
