Furniture Specification & Procurement

What we did

Workplace Designs were set the task of developing a FF&E design scheme for this global Social Media company to complement the interior design and vibrancy of the company.

Through stakeholder consultation, WDL identified the relevant ways of working that suited the client teams and looked to create different scenes to offer choice to those using the space.

The scheme created a space that was versatile, functional and inviting, where all staff and visitors can enjoy the facility whilst being productive and interactive.
